

DX WORLDWIDE EAST

First of all I must restate that as of the end of 1983 I'm resigning as editor due to night school. That means the final DXWW-E will be typed from here just before New Years Day. I am hopeful that a new editor will step forward by that time !! As I stated before, I'll be in school two years & at the completion of my master's degree program, I'll be willing to take the column back if the new editor no longer wishes to do it.

CX here have been very interesting almost every time I turn the rx on. 12/4 was good for lowband low-latitude TA's. 12/7 had tremendous signals from lowband Iberians & N.Africans, 12/9 was like a Caribbean bandscan. 12/10, 11, 12 had xlint cx to Africa w/12/11 being unbelievable!!!
